-

The COPYTRON® WCD 500 is a universal ticket vending machine. In the standard version all standard cards (85.60 mm × 53.98 mm × 0.76 mm) can be used.

Due to its very stable construction the WCDA 500 can be used everywhere where ticket sales should be handled without personnel, e.g. in schools, universities.

On request the WCD 500 can be equipped with a 2nd dispenser. The card stock then doubles to a total of 850 cards.
