

COPYTRON® PAYSI-COPY

Simple operation with 4 short-stroke keys and LC display with plain text menu

Mechanical shutter most effectively prevents the insertion of foreign objects

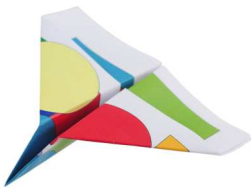

the cards can be inserted in **all 4 directions**

PAYSI inspires everyone - buyers, users and service technicians

The excellent price / performance ratio for an RFID card reader is exceptional. The mounting bracket is included in the standard scope of delivery. For most copiers, the plug is even included at no extra charge. When using PAYSI one-way cards, a card reloader is no longer required.

The operation is very easy to use and does not require any training time. When inserting the cards, there is no need to pay attention to the direction. This guarantees excellent acceptance by the users. If the users are satisfied, so are your customers.

Maintenance work is practically unnecessary thanks to the maintenance-free card reader with a mechanical lock for foreign objects. The robust yet simple structure makes the service technician's work much easier. The entire electronics can be removed in two easy steps after loosening the two screws on the back.

PAYSI turns customers into satisfied customers! Take advantage of it.
