
Copier Accounting System COPYTRON[®] PAYSI-Copy

- Chip card accounting system with contactless PAYSI one-way card & Mifare[®] chip card
- LC-Display, 2 x 16 characters, backlight
- The shutter prevents the possibility of inserting coins or other objects
- Automatically activation of Paysi one-way cards with first use
- Four prices for different copies
- One relay with two changeover contacts
- Inputs galvanically isolated (bipolar)
- All settings are accessible by inserting the setup card
- Interim- and total-counter (data backup in case of power failure)
- Optional with network interface 10/100MBit for communication with COPYTRON[®]-Manager and INPAS 300 / INPAS400 available
- Dimensions in mm: 92 (H) x 63 (W) x 190 (D)
- Colour: RAL 9002 / RAL 5007
- Weight: 0,8 kg (without power supply unit)
- Power supply: 5 V DC, 330mA

COPYTRON[®] is a registered trademark of HÖR electronic.

General:

The copier accounting system PAYSI-Copy is an universal usable chip card system and is almost suitable to any copier. It is the ideal solution for schools, universities, libraries, copy shops, etc.

Using the contactless Mifare[®] smart card the CA 3020 is reliable, nearly maintenance-free and protected against manipulation.

The Paysi-Copy accepts smart cards working as debit cards, access cards and cost centre cards. All 3 card types can operate in an asynchronous balance mode (e.g., copy-shop: debit cards for regular customers, access cards for casual customers, cost centre cards for staff).

The optional network interface allows the administration of all settings and meter reading with the COPYTRON-manager via Ethernet. Furthermore, network print jobs can be billed in connection with INPAS 300 or INPAS 400. The print jobs can be picked up at any PAYSI-Copy (Follow-me-function).
